E-LEARNING WEBSITE AUDITING AND DIGITAL MARKETING IMPLEMENTATION

Case Study: Great Learning

Digital Marketing Internship
Unified Mentor

Presented by: Rinky Jakhotra

2026

Project Introduction

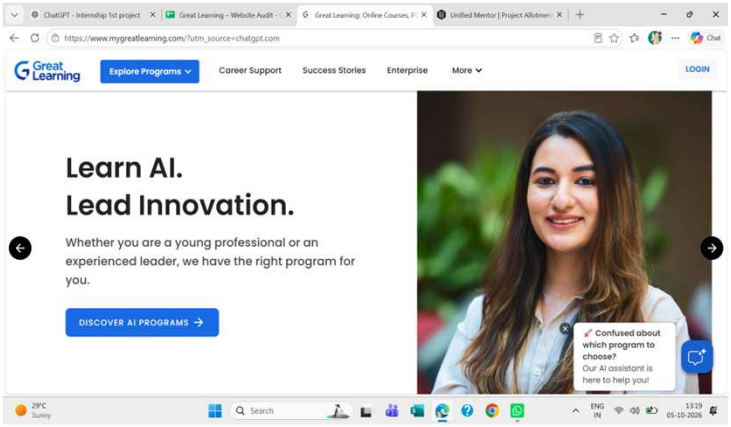

- **About the Project**
- This project focuses on auditing an e-learning website and developing a digital marketing strategy to improve its visibility, user experience and conversion opportunities.
- **Website Selected**
- Great Learning — an e-learning platform offering online courses, professional programs and career-focused learning opportunities.
- **Project Approach**
- Audit → Analyze → Optimize → Promote → Measure

Project Objectives

- Website Audit
  Evaluate design, navigation, UX, mobile experience, SEO, content and performance.
- SEO Optimization
  Identify keyword and on-page SEO opportunities to improve search visibility.
- UX & Conversion Improvement
  Propose improvements to navigation, course discovery, mobile experience and CTAs.
- **Content & Social Media Strategy**
  Develop content ideas and platform-specific social media strategies.
- **Paid Advertising Strategy**
  Design a proposed Google Search Ads campaign using relevant keywords and match types.
- **Analytics & Measurement**
  Define KPIs to measure website, SEO, social media and conversion performance.

Website Selected – Great Learning

- **Website:** Great Learning
- **Type:** E-learning & professional education platform
- **Target Audience:**
- Students
- Working professionals
- Career switchers
- **Key Offerings:**
- AI & Machine Learning
- Data Science & Analytics
- Technology & Software
- Management
- Professional & Degree Programs

Great Learning was selected as the case-study website for evaluating its website experience, SEO, digital marketing and conversion opportunities

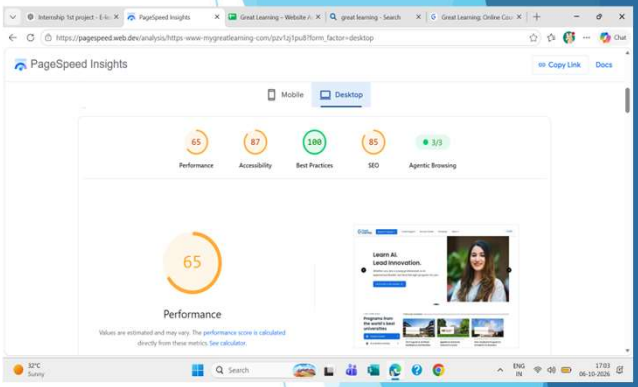

Website Audit Findings

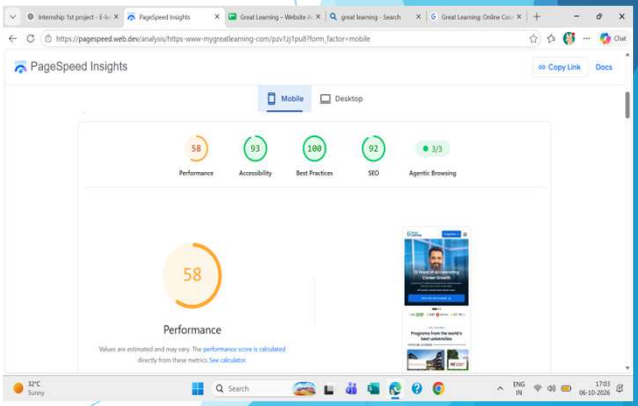

Audit Areas

- **Website Design**
  Clean, modern and professional design.
- **Navigation**
  Clear program categories and course discovery.
- **User Experience**
  Detailed program information with prominent CTAs.
- **Mobile Experience**
  Responsive layout, but performance can be improved.
- **SEO**
  Relevant title, meta description and H1 structure.
- **Content**
  Detailed courses, programs and learning information.

Key Findings

- **Performance**
- Desktop Performance: **65**
- Mobile Performance: **58**
- Mobile Core Web Vitals: **Needs Improvement**
- **Conversion**
- Prominent **Download Brochure**
- Prominent **Apply Now**
- **Main Improvement Areas**
- Mobile performance
- CTA visibility
- Technical/on-page SEO
- User experience
- Course discovery

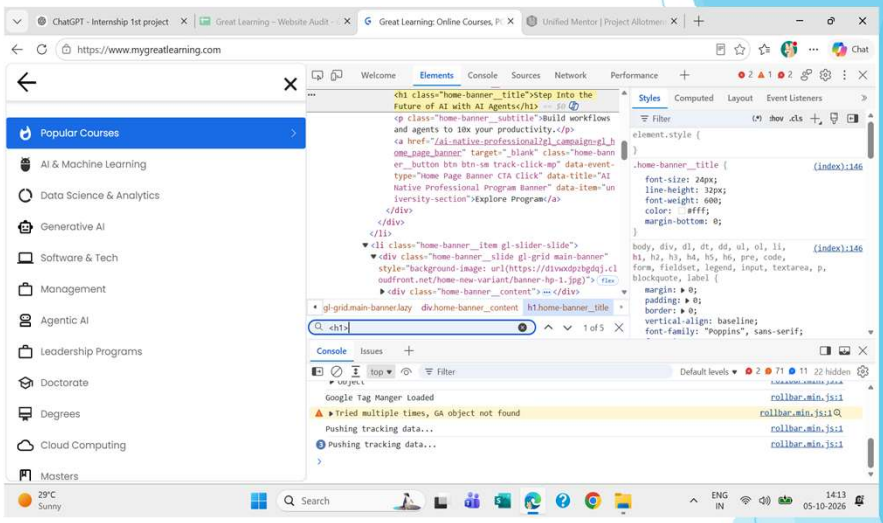

Overall, Great Learning provides a strong e-learning experience, but opportunities exist to improve mobile performance, SEO, UX and conversion optimization.

SEO Audit & Findings

- Page Title
  Great Learning: Online Courses, PG Certificates and Degree Programs
- **Meta Description**
  Includes relevant terms related to AI, ML, data science, digital marketing and cloud.
- H1 Heading
  Step Into the Future of AI with AI Agents
- Keywords
  Uses keywords related to online courses, e-learning, PG programs and artificial intelligence.
- Main SEO Opportunity
  Improve keyword targeting and create clearer, search-intent-focused page content.

SEO Audit Evidence – Page Source

Recommendation: Optimize page titles, meta descriptions, H1 headings and keyword targeting while maintaining clear and useful content for users.

SEO Optimization Strategy

SEO Element	Before	Proposed
Page Title	Great Learning: Online Courses, PG Certificates and Degree Programs	Online Courses & AI Programs | Great Learning
Meta Description	Broad description covering multiple learning areas	Clear, keyword-focused description highlighting online courses, AI and career-focused programs
H1 Heading	Step Into the Future of AI with AI Agents	Learn AI, Data Science & Digital Skills with Great Learning
Keywords	General e-learning and course-related keywords	High-intent keywords based on user search intent
Image ALT Text	Opportunity for improvement	Add descriptive ALT text naturally using relevant terms
Internal Links	Multiple program and resource pages are available	Connect relevant courses, blogs and program pages

Expected Benefits

Improved search relevance • Better content clarity • Stronger internal linking • Better accessibility • Increased potential for organic visibility and traffic

Content & Social Media Strategy

- Content Marketing

  - **Blog**
  - “Best AI Courses for Beginners”
  - How to Start a Career in Data Science
  - **Video**
  - AI & Machine Learning Explained
  - Course and career guidance videos
  - **Webinars**
  - Future Career Opportunities in AI
  - Industry-focused learning sessions
  - **Success Stories**
  - Learner achievements and career journeys

- Social Media

  - **Instagram**
  - Reels
  - Course tips
  - Student success stories
  - **LinkedIn**
  - Career tips
  - Industry insights
  - Program updates
  - **YouTube**
  - Educational videos
  - Webinars
  - Course explainers
  - **Facebook**
  - Program updates
  - Educational posts
  - Success stories

Objective: Increase brand awareness, organic traffic, engagement and potential learner interest through platform-specific content.

Paid Advertising Strategy – Google Ads

Campaign Setup

- **Campaign Type:**
  Google Search Ads
- **Objective:**
  Generate relevant leads and increase program enquiries.
- **Target Audience:**
  Students, working professionals and career switchers.
- **Target Location:**
  India
- **Budget:**
  ₹0 - Proposed/Simulation Only
- **Landing Page:**
  Relevant Great Learning program page

Match Types Used
Broad Match → online courses
Phrase Match → "online courses"
Exact Match → [online courses]

Keyword Strategy

- **Ad Group 1 - Online Courses**
- [online courses]
- "online courses"
- online courses
- **Ad Group 2 - AI Courses**
- [ai courses]
- "artificial intelligence courses"
- "machine learning courses"
- **Ad Group 3 - Data Science**
- [data science courses]
- "data science courses"
- "data analytics courses"

This campaign is proposed for learning and project demonstration only. No paid advertising budget is being spent.

Google Search Ad – Sample

Sponsored · Great Learning

Online AI Courses | Great Learning

Learn AI & Data Science

Explore Great Learning Programs

Description:

Build career-focused skills with online AI and data science programs. Explore courses and programs designed for today's learners.

CTA:

Explore Programs

Below the mock ad, add:

Target Keywords

- [ai courses]
- "online ai courses"
- "data science courses"

Ad Objective:

Generate relevant program enquiries and encourage users to explore suitable courses.

Sample advertisement created for project demonstration. No paid campaign was launched.

Website Redesign & UX Recommendations

Current Website

Current Strengths

- Clean and professional design
- Clear program categories
- Detailed course information
- Prominent **Apply Now** and **Download Brochure** CTAs
- Responsive mobile layout

Current Challenges

- Mobile performance needs improvement
- Some pages contain a lot of information
- Course discovery can be made easier
- CTA visibility can be strengthened

Proposed Improvements

Homepage

- Clearer value proposition
- Stronger primary CTA
- Highlight popular programs

Navigation

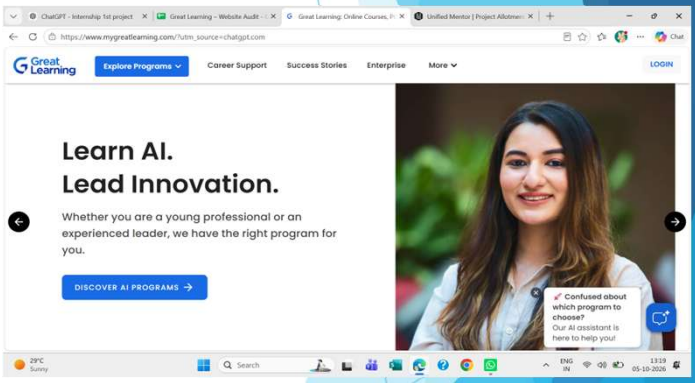

- Simplify program categories
- Improve course search and filtering

Mobile UX

- Improve page loading speed
- Reduce popup interference
- Keep important CTAs visible

Conversion

- Add trust elements near CTAs
- Make enquiry/application journey simpler

Goal: Create a simpler, faster and more conversion-focused learning experience.

Analytics & Measurement

Tools

Google Analytics 4

- Monitor website traffic
- Track user behavior
- Measure conversions

Google Search Console

- Monitor search performance
- Track clicks and impressions
- Monitor indexing and search queries

Google Ads

- Monitor clicks and CTR
- Track conversions
- Measure cost per lead *(if a campaign is actually run)*

Social Media Analytics

- Reach
- Engagement
- Follower growth
- Link clicks

Key Performance Indicators

Website

- Users & sessions
- Engagement
- Conversion rate

SEO

- Organic clicks
- Impressions
- CTR
- Average position

Social Media

- Reach
- Engagement rate
- Shares & comments

Conversion

- Enquiries
- Brochure downloads
- Application starts

Measurement Approach: Compare baseline audit results with future performance after implementing the proposed SEO, UX and digital marketing improvements.

“Competitor Analysis – upGrad”

Great Learning

Strengths

- Wide range of online programs
- Clear program categories
- Career-focused learning
- Detailed program information
- Strong CTA options

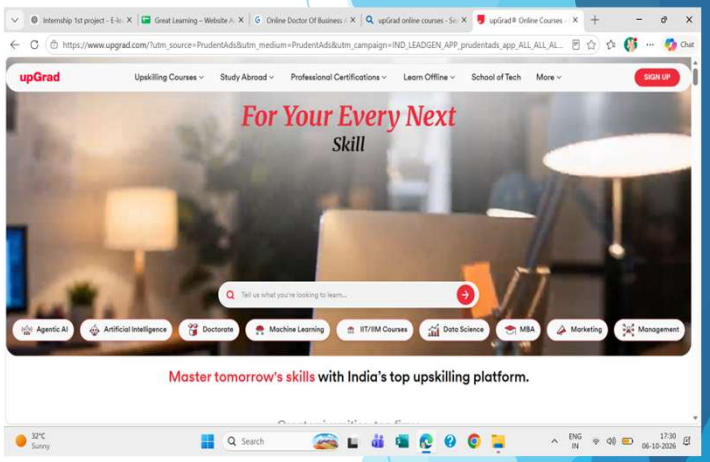

Improvement Opportunities

- Improve mobile performance
- Make course discovery easier
- Strengthen CTA visibility
- “Strengthen SEO optimization”

upGrade

Observed Strengths

- Wide range of courses
- Clear course categories
- Search functionality
- Prominent CTA
- Strong course discovery focus

Competitive Learning

Great Learning can strengthen its competitive position by improving course search/filtering, mobile performance and conversion-focused UX.

Competitor: upGrad

Purpose: Identify useful competitor features and opportunities to improve Great Learning’s UX and digital marketing strategy.

Implementation Plan

Main content

1. Website Audit

Analyse design, UX, SEO, content, performance and conversion.

2. SEO Optimization

Improve titles, meta descriptions, H1, keywords, ALT text and internal links.

3. UX & Website Improvements

Improve navigation, course discovery, mobile experience and CTA visibility.

4. Content Marketing

Create blogs, videos, webinars and learner success stories.

5. Social Media Promotion

Promote educational content through Instagram, LinkedIn, YouTube and Facebook.

6. Paid Advertising

Use Google Search Ads and other proposed campaigns to target high-intent audiences.

₹0 actual spend — simulation only.

7. Analytics & Optimization

Track traffic, SEO, engagement and conversions, then continuously improve.

Audit → Plan → Optimize → Promote → Measure → Improve

Expected Outcomes

Website & SEO

Improved Website Experience

- Better navigation and course discovery
- Improved mobile experience
- Faster page performance

Stronger SEO

- Better keyword targeting
- Improved on-page SEO
- Better internal linking
- Potential increase in organic visibility

Marketing & Conversion

Better Digital Marketing

- Increased content engagement
- Stronger social media presence
- Better audience targeting

Improved Conversion Opportunities

- Clearer CTAs
- Better learner journey
- More potential enquiries and brochure downloads

Overall Goal: Create a faster, more user-friendly and search-optimized e-learning experience that supports greater visibility, engagement and conversion opportunities.

Conclusion

- This project provided a practical audit of Great Learning as an e-learning website and identified key opportunities for improvement in SEO, UX, mobile performance, content and conversion.

•**SEO:** Improve search relevance and organic visibility.
•**UX:** Create a simpler and more user-friendly learning journey.
•**Digital Marketing:** Strengthen content, social media and paid advertising strategies.
•**Measurement:** Use analytics and KPIs to evaluate future performance.

The proposed strategy combines Audit → Optimization → Promotion → Measurement to support sustainable digital growth.

Thank You

Thank you for your time and attention.
