Great Learning – SEO Optimization Implementation

SEO Optimization – Before & After

SEO Element	Current	Proposed
Page Title	Great Learning: Online Courses, PG Certificates and Degree Programs	Online Courses & AI Programs | Great Learning

SEO Element	Current	Proposed
Meta Description	Great Learning offers online courses, PG certificates and degree programs.	Explore online courses, AI programs, PG certificates and degree programs from Great Learning.
H1 Heading	Learn AI. Lead Innovation.	Learn AI, Data Science & Digital Skills with Great Learning
URL	https://www.mygreatlearning.com/	Keep the existing URL
Primary Keywords	Online courses, PG programs, AI courses	Online courses, AI courses, Data Science courses, PG programs

SEO Implementation Plan

SEO Area	Action to Implement	Expected Benefit
Page Title	Optimize title with relevant keywords	Better search visibility
Meta Description	Add a clear keyword-focused description	Improve click-through rate
H1 Heading	Use a clear, keyword-relevant H1	Better content relevance
Keywords	Target relevant high-intent keywords	Attract the right audience
Images	Add descriptive ALT text	Improve image SEO and accessibility
Internal Links	Add relevant links between pages	Improve navigation and SEO

Keyword Optimization Strategy

Keyword	Search Intent	Target Page	Purpose
online courses	Informational	Homepage	Attract users looking for online learning
AI courses	Informational	AI Programs	Attract AI learners
data science courses	Informational	Data Science Programs	Attract data science learners
digital marketing courses	Informational	Digital Marketing Programs	Attract marketing learners
online PG programs	Commercial	PG Programs	Attract users comparing programs

Meta Description Optimization

SEO Element	Current	Proposed
Meta Description	Learn the in-demand skills to advance your career in AI, ML, data science, digital marketing, cloud, software engg & more…	Explore online courses, AI, data science, digital marketing and other career-focused programs with Great Learning.

Implementation Rationale:

The proposed meta description clearly communicates Great Learning’s offerings and includes relevant keywords to improve search visibility and encourage users to click the result.

H1 & Content Optimization

Element	Current	Proposed
H1 Heading	Step Into the Future of AI with AI Agents	Learn AI, Data Science & Digital Skills with Great Learning
Content Focus	Courses, programs and career-focused learning	Clear, keyword-focused content highlighting courses, skills, career benefits and learner outcomes

Implementation Rationale:

The proposed H1 provides clearer information about the website's main offerings and incorporates relevant keywords. Content should be organized around user search intent, course benefits and career outcomes.

Image SEO & Internal Linking

SEO Area	Current Issue	Proposed Implementation	Expected Benefit
Image ALT Text	Images should have descriptive ALT text	Add descriptive ALT text using relevant keywords naturally	Better image SEO and accessibility
Internal Linking	Multiple programs and resources are available	Add relevant links between courses, blogs and program pages	Better navigation and page discovery

Anchor Text	Links should clearly describe their destination	Use descriptive anchor text such as “Explore AI Courses”	Better usability and SEO

Implementation Rationale:

Descriptive ALT text improves accessibility and image search visibility, while relevant internal links help users discover related content and strengthen the website’s internal link structure.

Social Media Marketing Strategy

Platform	Target Audience	Content Type	Objective
Instagram	Students and young professionals	Reels, course tips, student success stories	Increase awareness and engagement
LinkedIn	Working professionals and career switchers	Career tips, industry insights, program posts	Generate qualified leads
YouTube	Students and professionals	Course explainers, webinars, educational videos	Build trust and drive traffic
Facebook	Students and working professionals	Program updates, success stories, educational posts	Increase reach and engagement

Social Media Strategy:

Great Learning should use platform-specific content to reach different audience segments. Short educational videos can be used on Instagram and YouTube, while LinkedIn can focus on career development, industry trends and professional learning.

Content Marketing Strategy

Content Type	Topic / Example	Target Audience	Objective
Blog	“Best AI Courses for Beginners in 2026”	Students and beginners	Increase organic traffic
Blog	“How to Start a Career in Data Science”	Career seekers	Generate interest in programs
Video	“AI & Machine Learning Explained”	Students and professionals	Build awareness
Success Story	“How a Learner Advanced Their Career”	Prospective learners	Build trust and credibility
Webinar	“Future Career Opportunities in AI”	Working professionals	Generate leads

Content Marketing Strategy:

Content should address common learner questions and search intent. Educational blogs, videos, webinars and learner success stories can attract visitors, build trust and guide potential learners toward relevant programs.

Paid Advertising Strategy

Advertising Channel	Target Audience	Ad Type	Objective
Google Search Ads	Users searching for online courses	Search Ads	Generate high-intent leads
Google Display Ads	Students and professionals	Display Ads	Increase awareness and remarketing
YouTube Ads	Students and career seekers	Video Ads	Build awareness and drive traffic
Instagram/Facebook Ads	Students and young professionals	Image/Reel Ads	Generate leads and engagement
LinkedIn Ads	Working professionals	Sponsored Content	Generate professional leads

Paid Advertising Strategy:

Paid campaigns should target users based on search intent, interests and professional profiles. Search Ads can capture high-intent users, while social media and video advertising can support awareness, remarketing and lead generation.

Email Marketing & Conversion Strategy

Strategy	Example	Objective
Welcome Email	Welcome new users and introduce relevant programs	Build engagement
Course Recommendation	Suggest programs based on user interests	Increase course enquiries
Webinar Email	Promote upcoming webinars and events	Generate registrations

Follow-up Email	Follow up with users who showed interest	Increase conversions
Success Story Email	Share learner achievements and outcomes	Build trust

Email & Conversion Strategy:

Personalized email communication can nurture potential learners throughout the decision-making process. Clear CTAs such as “Explore Program,” “Download Brochure” and “Apply Now” should guide users toward conversion.

Before vs. After Optimization

Area	**Before**	**Proposed Improvement**
SEO Title	General title covering courses and programs	More focused title with high-value keywords
Meta Description	Broad description of available learning areas	Clear, keyword-focused description with stronger user appeal
H1	Focused mainly on AI Agents	Broader H1 covering AI, Data Science and Digital Skills
Keywords	Multiple general e-learning keywords	Targeted keywords based on search intent
Content	Course and program information	More structured content around learner needs and career outcomes
Mobile Performance	Performance score 58	Improve loading speed and Core Web Vitals
Conversion	Prominent Apply Now and Download Brochure CTAs	Keep CTAs prominent with stronger supporting trust information
Social Media	Existing social presence	Platform-specific content strategy

Content Marketing	Existing educational/program content	Blogs, videos, webinars and success stories
Paid Advertising	Opportunity for targeted campaigns	Search, display, video and social campaigns

Implementation Summary:

The proposed improvements focus on SEO, user experience, performance, content marketing, social media, paid advertising and conversion optimization. These recommendations are designed to improve organic visibility, user engagement, lead generation and enrolment opportunities.

Paid Advertising Strategy – Google Search Ads

The proposed paid advertising strategy focuses on Google Search Ads to reach users actively searching for online courses and career-focused learning programs. Since this internship project does not involve actual advertising expenditure, the campaign is designed as a practical simulation. The campaign structure, keywords, ad copies, targeting and performance metrics are proposed for demonstration and learning purposes only.

Campaign Element	**Proposed Plan**
Campaign Name	Great Learning – Online Courses – Search Campaign
Campaign Type	Google Search Ads
Campaign Objective	Generate relevant website visits and potential course enquiries
Target Audience	Students, working professionals and career switchers
Target Location	India
Language	English
Budget	₹0 actual spend – simulation/proposal only
Landing Page	Relevant Great Learning course/program page

Proposed Google Ads Ad Groups

Ad Group	Target Theme	Example Keywords
Online Courses	General online learning	online courses, online learning courses
AI Courses	Artificial Intelligence learning	AI courses, artificial intelligence courses, machine learning courses
Data Science Courses	Data and analytics learning	data science courses, data analytics courses

Keyword Match Types

Keyword Type	Example	Purpose
Broad Match	online courses	Reaches a broad range of relevant searches
Phrase Match	"online courses"	Targets searches related to the meaning of the phrase
Exact Match	[online courses]	Provides more controlled, closely related searches
Negative Keywords	-jobs	Prevents ads from showing for unwanted searches

Sample Google Search Ad

Ad Element	Proposed Ad Copy
Headline 1	Online AI Courses
Headline 2	Learn AI & Data Science
Headline 3	Explore Great Learning
Description 1	Build career-focused skills with online AI and data science programs.
Description 2	Discover flexible programs designed to help you build in-demand skills.
Call to Action	Explore Programs

Purpose of the Ad

The proposed search ad is designed to target users who are actively searching for online courses, AI courses and data science programs. The ad highlights career-focused learning and encourages users to explore relevant Great Learning programs.

Negative Keyword Strategy

Negative Keyword	Reason
jobs	Avoid users searching for employment opportunities
salary	Avoid users looking for salary information
meaning	Avoid informational definition-based searches
pdf	Avoid users specifically looking for PDF resources
free	Avoid users looking specifically for free courses when promoting paid programs

Expected Benefit

Using negative keywords can help improve the relevance of search traffic, reduce unwanted clicks and make the proposed campaign more focused on potential learners.

Target Audience & Campaign Targeting

Targeting Element	Proposed Strategy
Location	India
Language	English
Age Group	18–45 years
Audience	Students, working professionals and career switchers
Interests	Online learning, technology, AI, data science and career development
Search Intent	Users actively searching for online courses and professional programs
Device	Mobile, desktop and tablet
Ad Schedule	Business hours and high-search periods; optimize based on campaign data

Targeting Strategy

The proposed campaign will focus on users who demonstrate an interest in online education, professional development, artificial intelligence, data science and career advancement. Search-based targeting will help reach users who are already looking for relevant courses or programs.

Why This Targeting?

The targeting strategy is designed to reach potential learners at the stage when they are actively exploring educational and career-development opportunities. This can help improve the relevance of website visits and potential enquiries.

Google Ads KPIs & Performance Measurement

KPI	What It Measures	Project Target
Impressions	Number of times the ad is shown	Monitor reach
Clicks	Number of users clicking the ad	Increase relevant traffic
CTR	Percentage of users who click the ad	Aim for a healthy CTR
CPC	Average cost per click	Monitor advertising efficiency
Conversions	Desired actions such as enquiry or brochure download	Increase qualified leads
Conversion Rate	Percentage of visitors completing a desired action	Improve landing-page effectiveness
Cost Per Lead	Cost required to generate a lead	Keep acquisition efficient

Measurement Plan

Since no paid advertising budget will be used in this internship project, no actual Google Ads campaign results will be reported. The above KPIs will be used as measurement criteria for evaluating the proposed campaign. If the campaign were launched in the future, Google Ads and Google Analytics could be used to track clicks, traffic, conversions and lead-generation performance.

Expected Outcome

The proposed campaign is expected to improve the visibility of relevant Great Learning programs, attract users with higher search intent and support potential course enquiries and conversions.

Website Redesign Proposal

Based on the website audit, several opportunities were identified to improve user experience, mobile performance, content clarity and conversion. The following redesign proposal focuses on making the Great Learning website easier to navigate, more user-friendly and more conversion-focused while maintaining its professional visual identity.

Redesign Recommendations

Area	Current Observation	Proposed Improvement	Expected Benefit
Homepage	Professional design with multiple program options	Make the main value proposition more prominent and concise	Improve clarity
Navigation	Programs are organized into categories	Add stronger course search and filtering options	Easier course discovery
Hero Section	Main CTA is visible	Add a clear primary CTA with supporting information	Increase engagement
Course Discovery	Multiple programs are displayed	Add filters for category, duration and learning level	Faster course selection
Mobile Experience	Mobile version is responsive but performance needs improvement	Optimize images, scripts and page resources	Better mobile UX
Content	Detailed program information is available	Organize content around learner needs, benefits and outcomes	Improve understanding
Conversion	“Apply Now” and “Download Brochure” CTAs are available	Keep CTAs prominent and add supporting trust information	Encourage enquiries
Performance	Mobile performance score was lower than desktop	Optimize page speed and Core Web Vitals	Improve performance

Redesign Objective

The main objective of the proposed redesign is to simplify the user journey from discovering a program to taking a conversion action such as downloading a brochure or applying for a program. The redesign also aims to improve mobile usability, content clarity and website performance.

Proposed Homepage Structure

Section	Proposed Content	Purpose
1. Header	Logo, Programs, Career Support, Success Stories, About, Login	Simple and easy navigation
2. Hero Section	Clear headline, short description and “Explore Programs” CTA	Communicate the main value proposition
3. Popular Programs	AI, Data Science, Digital Marketing, Management and other programs	Help users discover courses quickly
4. Why Great Learning?	Key benefits, learning format and career support	Build trust
5. Career Outcomes	Learner success stories and career achievements	Increase credibility
6. Learning Categories	AI, Data Science, Management, Technology, etc.	Improve course discovery
7. Student Testimonials	Reviews and learner experiences	Build social proof
8. Resources	Blogs, webinars, videos and career resources	Support content marketing and SEO
9. Final CTA	“Explore Programs” / “Download Brochure”	Encourage conversion
10. Footer	Important links, contact information and social media	Easy access to additional information

Proposed Homepage Improvement

The redesigned homepage should guide users through a clear journey: Discover → Explore → Compare → Build Trust → Take Action. Important calls-to-action should remain visible without excessive interruptions, particularly on mobile devices.

Expected Benefits

- Better user navigation
- Faster course discovery
- Improved mobile experience
- Stronger trust and credibility
- Better visibility of important CTAs
- Improved potential for enquiries and enrolments

Mobile UX & CTA Optimization

Area	Current Issue	Proposed Improvement	Expected Benefit
Mobile Performance	Mobile performance score is lower than desktop	Compress images and optimize scripts/resources	Faster loading
Mobile Navigation	Users have limited screen space	Keep navigation simple with an easy-to-use menu	Easier browsing
CTA Visibility	Important CTAs can compete with other page elements	Keep primary CTAs clearly visible	More user actions
Pop-ups	Pop-ups can interfere with important content	Reduce unnecessary pop-ups and interruptions	Better user experience
Course Information	Mobile users need quick access to key details	Highlight duration, format, benefits and eligibility	Faster decision-making
Forms	Long forms can discourage users	Use shorter and simpler enquiry forms	Increase potential leads

Mobile Optimization Objective

The proposed mobile optimization aims to provide a faster, simpler and more conversion-focused experience. Important information and CTAs should remain easily accessible without requiring excessive scrolling or being blocked by unnecessary pop-ups.

CTA Strategy

Primary CTAs such as **“Explore Programs,” “Download Brochure” and “Apply Now”** should remain visually prominent and strategically placed throughout the user journey.

Navigation & Course Discovery Optimization

Area	**Current Observation**	**Proposed Improvement**	**Expected Benefit**
Program Categories	Programs are divided into multiple categories	Keep categories clearly organized with simple labels	Easier navigation
Course Search	Users may need to browse several options	Add a prominent course search feature	Faster course discovery
Filters	Many programs have different formats and durations	Add filters for subject, level, duration and learning format	Easier comparison
Program Cards	Program cards provide basic information	Highlight duration, format, key benefits and CTA	Faster decision-making
Internal Navigation	Multiple program and resource pages are available	Add relevant internal links between programs, blogs and resources	Better page discovery
Breadcrumbs	Useful for deeper program pages	Add clear breadcrumbs such as Home → Category → Program	Improve navigation

Course Discovery Objective

The proposed navigation improvements aim to reduce the time users need to find a suitable program. Clear categories, search, filters and descriptive program information can help users move smoothly from course discovery to program evaluation and conversion.

Expected Benefits

- Easier course discovery
- Better navigation
- Improved user experience
- Increased engagement with program pages
- Smoother path toward enquiries and enrolment

Analytics & Reporting Strategy

Analytics and reporting will be used to measure the effectiveness of the proposed SEO, content marketing, social media, paid advertising and website optimization strategies. The performance of the website can be monitored using tools such as Google Analytics and Google Search Console, along with platform-specific social media and advertising insights.

Area	**Tool / Platform**	**Key Metrics**
Website Traffic	Google Analytics	Users, sessions, traffic sources
SEO	Google Search Console	Clicks, impressions, CTR, average position
Website Performance	PageSpeed Insights	Performance score, LCP, INP, CLS
Google Ads	Google Ads	Impressions, clicks, CTR, CPC, conversions
Social Media	Platform Insights	Reach, impressions, engagement, followers
Content Marketing	Google Analytics	Page views, engagement, traffic
Conversions	Google Analytics / Website	Enquiries, brochure downloads, applications

Reporting Approach

The project will compare the identified baseline performance with future performance after implementing the proposed improvements. Regular monitoring of traffic, SEO visibility, engagement, website performance and conversion-related metrics can help identify successful strategies and areas requiring further optimization.

Implementation Plan

Phase	Implementation Activity	Main Focus
Phase 1	Website Audit	Identify UX, SEO, content, performance and conversion issues
Phase 2	SEO Optimization	Improve title, meta description, H1, keywords, ALT text and internal links
Phase 3	Website UX Improvements	Improve navigation, course discovery, mobile experience and CTAs
Phase 4	Content Marketing	Create blogs, videos, webinars and learner success stories
Phase 5	Social Media Promotion	Promote educational content and programs across relevant platforms
Phase 6	Paid Advertising	Develop the proposed Google Search Ads campaign without actual spending
Phase 7	Analytics & Tracking	Monitor SEO, traffic, engagement, performance and conversion KPIs
Phase 8	Review & Optimization	Compare performance and identify further improvement opportunities

Implementation Objective

The implementation plan provides a structured approach for applying the recommendations identified during the Great Learning website audit. The focus is on improving search visibility, user experience, content quality, website performance and conversion opportunities through practical digital marketing strategies.

Project Approach

The project follows an Audit → Plan → Optimize → Promote → Measure → Improve approach. This ensures that each proposed digital marketing activity is connected to a specific website or marketing objective and can be evaluated using measurable performance indicators.

Project Summary

The Great Learning website audit identified several opportunities to improve user experience, SEO, website performance, content strategy and conversion opportunities. Based on the audit findings, a comprehensive digital marketing and website optimization strategy was developed.

The proposed strategy includes on-page SEO improvements, keyword optimization, content marketing, social media promotion, email marketing, conversion optimization and a simulated Google Search Ads campaign. A website redesign proposal was also developed to improve navigation, course discovery, mobile usability, page performance and CTA visibility.

The project follows an integrated approach in which SEO helps improve organic visibility, content marketing provides useful information to learners, social media increases awareness and engagement, paid advertising targets high-intent users, and website optimization supports conversions.

As this internship project does not involve actual advertising expenditure or modifications to Great Learning's live website, the proposed strategies are presented as practical recommendations and implementation plans. The identified KPIs can be used to measure the effectiveness of these strategies if implemented in the future**.**

Key Expected Outcomes

Area	Expected Outcome
SEO	Improved search visibility
UX	Easier and smoother user journey
Mobile	Better mobile usability and performance
Content	Increased useful and relevant content
Social Media	Greater awareness and engagement
Paid Advertising	Ability to reach high-intent users
Conversion	Better visibility of enquiry and enrolment CTAs
Analytics	Clear measurement of digital marketing performance
